Front end user interface. Text input areas and buttons are forms that send a post request with on submit.

EXPRESS

Create new blog, remove blog given blog number, update blog given blog number, and delete all blog routes. Tied to forms on front end that constitute text are inputs and remove buttons. Interfaces with MongoDB database using Mongoose and a schema that allows for blog body text contents and blog number. Accessed in database by blog number.

MONGODB

Contains blog entries with contents and number as schema.
